SPAUNING
AREA: 111 m² (200'x10'x60% ASA)
Gentle slopes

This is a small creek with limited spawning area. It drains a large muskeg area and is subject to considerable changes in water level. No fry or signs of adults were seen but looks as though it would support a small pink run of approximately 400 spawners (200' x 10' x 60% ASA). Dungeness crabs observed in Morse Cove.
